

## Engineering your flow

**Medtech Diagnostic Sterilization Dialysis**  
**Printing Cooling Systems Food & Beverage**

### OVERVIEW

Diener Precision Pumps designs and manufactures precision-engineered pumps for OEM fluid handling systems worldwide. Supplying a full diversity of markets ranging from Medical device to Beverage dispense.

The company produces custom pumps in three basic styles : metering pumps, gear pumps and gerotor pumps. Product design/validation is performed at our California R&D facility and all manufacturing and production testing is performed at our Swiss manufacturing site.

### EXPERTISE

Our design/development team has over 100 combined years of experience in custom pump development. We use only state-of-the-art equipment to design, manufacture and test our products. Our Swiss manufacturing team has been manufacturing precision pump components for over thirty years.

Quality control is maintained to ISO 9001:2015. All manufacturing processes are completely documented and all pump materials are 100% traceable.

### PRODUCTS

- *Silencer Series* gear pumps : cost effective, a compact design offering a long maintenance free life with repeatable performance.
- *Extreme Series* gear pumps : works with viscous fluids at high flow and high pressure.
- *Cerotor Series* ceramic gerotor pumps : the ultimate pumping solution for handling fluids with abrasive particulate such as pigmented inks.
- *Precision Series* metering pumps : ideal for accurate dosing requirements, in applications such as diagnostic laboratory instruments.
